Michael Schultz
Publication inventory

Verified bibliography, DOI audit and full-text access
Research status: 5 November 2026

The inventory contains 58 verified output records: 20 journal articles and 38 other research outputs. One additional supplied report remains unverified. Presentations and contributor-only work are identified separately and are not represented as journal publications.

Identity: Michael Schultz, remote sensing and geoinformatics, Wageningen / Heidelberg / Tübingen / Jena. ORCID 0000-0002-4813-090X.

Output type	Records
Journal articles	20
Book chapters	5
Reports and report contributions	12
Conference and workshop papers, abstracts and contributions	13
Datasets	3
Theses	2
Edited proceedings	1
Presentation	1
Contributor-only policy brief	1

Coverage and citation rules

Publisher pages and DOI deposits were checked against ORCID, institutional repositories at Wageningen, Heidelberg, Tübingen, Jena, DLR and HCU, Zenodo, heiDATA, UNU, TIB and conference records. OpenAlex was used for discovery only. Same-name aviation, medical and unrelated technical records were not accepted as authorship evidence.

One work is counted once across duplicate entries, issue/online dates and mirrored files. Related datasets, edited proceedings and distinct conference abstracts are separate outputs. Event attendance and chairs are separated. Blank DOI/PDF means no verified identifier or retrievable file was established. Publisher, repository, whole-volume and thesis-chapter versions are labelled. Search coverage is extensive; unindexed or unpublished work still requires author confirmation.

Corrections to the supplied list

Record	Correction
Mandalay earthquake	Published in Science of Remote Sensing 13 (2026), 100358. Remove the duplicate in-review entry; the DOI contains 2025.
BIPE / iBIPE	One article, Remote Sensing 17(1), 7 (2025). First online 24 December 2024. Merge both entries.
Hue urban growth	Published 25 January 2025, ISPRS IJGI 14(2), 44. The supplied 2024 year is obsolete.
LandSense quality assurance	Guidelines DOI: 10.5281/zenodo.4452827. The supplied DOI 10.5281/zenodo.4133626 belongs to the separate evaluation II report.
Final issue vs online year	BFAST errors: 2016 issue / 2015 online; Foody VGI: 2024 issue / 2022 online; Schott chapter: 2024 book / 2023 online.
Authorship / work type	The vegetation-index article includes Valerio Avitabile. The 2021 UIS item is a chapter, not the whole textbook. WeObserve lists Schultz as contributor.
SURE chapters	The DOIs identify whole volumes. Vol.1 chapter spans printed pp108-116; Vol.2 pp86-92. Neither DOI should be described as chapter-specific.
